INDEPENDENT AUDIT REPORT

To the members of Tonga Power Limited

Scope
We have audited the accompanying financial statements of Tonga Power Limited (the company) which comprise the balance sheet as of 30 June 2009 and the income statement, statement of changes in equity and cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory notes as set out on pages 8 to 33.

Directors’ and Management’s Responsibility for the Financial Statements
Directors and Management are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and with the requirements of the Tonga Companies Act, 1995. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor’s Responsibility
This report is made solely to the company’s shareholders, as a body, in accordance with Section 220 of the Tonga Companies Act 1995. Our audit work has been undertaken so that we might state to the company’s shareholders those matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s shareholders as a body, for our audit work, for this report, or for the opinions we have formed. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by directors and management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
Opinion
In our opinion

(a) proper books of account have been kept by the company, so far as it appears from our examination of those books, and

(b) the accompanying financial statements which have been prepared in accordance with International Financial Reporting Standards:

(i) are in agreement with the books of account;

(ii) to the best of our information and according to the explanations given to us:

a) give a true and fair view of the state of affairs of the company as at 30 June 2009 and of its financial performance, changes in equity, and its cash flows for the year ended on that date;

b) give the information required by the Tonga Companies Act, 1995 in the manner so required.

We have obtained all the information and explanations which to the best of our knowledge and belief, were necessary for the purposes of our audit.

7th October 2009
Suva, Fiji

TONGA POWER LIMITED

DIRECTORS’ REPORT

In accordance with a resolution of the Board of Directors, the directors herewith submit the financial statements, statement of changes in equity and the company cash flow statement for the period ended 30 June 2009 and report as follows:

1. DIRECTORS

The following were directors of the company at any time during the financial period and up to the date of this report:
- Mr. David Wright – Chairman of the Board
- Hon. Afu’alo Matoto – Director
- Mr. Warren Moyes - Director
- Mrs ‘Alisi Nunia Taumoepeau – Director
- Mr. S. Tsutomu Nakao II - Director
- Mr. Richard Guttenbeil – Director

2. PRINCIPAL ACTIVITY

The principal business activity of the company is to generate and supply electricity to the people of Tonga. The company also undertakes certain electrical contracting work particularly for private customer service lines. Its registered office is located at the corner of Taufa’ahau Road and Mate’alona Road, Nuku’alofa, Tonga.

The company was incorporated on 29 August 2007 and commenced commercial operations on 25 July 2008. Consequently, there are no comparative figures.

3. TRADING RESULTS

The loss after income tax of the company for the financial period was $726,984 after adding income tax benefits of $193,774.

4. PROVISIONS

There were no material movements in provisions, other than provisions for leave, doubtful debts and taxes, where applicable.

5. DIVIDENDS

There was no dividend declared.

6. CURRENT ASSETS

The directors took reasonable steps before the company’s financial statements were made out to ascertain that the current assets of the company was shown in the accounting records at a value equal to or below the value that would be expected to be realised in the ordinary course of the business.

At the date of this report, the directors are not aware of any circumstances which would render the values attributable to the current assets in the financial statements misleading.
7. TRANSFERS TO/FROM RESERVES

The directors recommend that no amounts be transferred to reserves in respect of the period ended 30 June 2009.

8. BAD AND DOUBTFUL DEBTS

The directors took reasonable steps before the company’s financial statements were made out to ascertain that all known bad debts were written off and adequate provision was made for doubtful debts. At the date of this report, the directors are not aware of any circumstances which would render the amount written off for bad debts, or the amount of the provision for doubtful debts, inadequate to any substantial extent.

9. DIRECTORS’ BENEFIT

No director has received or become entitled to receive any benefit (other than benefits included in the amount of emoluments or shown in the financial statements under the related parties note) by reason of a contract made by the company or a related corporation with any director or with a firm of which a director is a member or with a company in which a director has a substantial financial interest.

10. EVENTS SUBSEQUENT TO BALANCE DATE

No charge on the assets of the company has arisen since the end of the financial period to the date of this report to secure the liabilities of any other person.

No contingent liability has arisen since the end of the financial period to the date of this report, other than those disclosed in Note 27 in the financial statements.

No contingent or other liability has become enforceable or is likely to become enforceable within a period of twelve months after the end of the financial period which, in the opinion of the directors, will or may affect the ability of the company to meet its obligations as and when they fall due.

11. OTHER CIRCUMSTANCES

At the date of this report, the directors are not aware of any circumstances not otherwise dealt with in this report or financial statements which would render any amounts stated in the financial statements misleading.

12. UNUSUAL TRANSACTIONS

The results of the company operations during the financial period have not in the opinion of the directors been substantially affected by any item, transaction or event of a material and unusual nature other than those disclosed in the financial statements.
In the opinion of the directors:

(a) the accompanying statement of financial performance was drawn up so as to give a true and fair view of the results of the company for the period ended 30 June, 2009;

(b) the accompanying statement of financial position is drawn up so as to give a true and fair view of the state of the company’s affairs at 30 June, 2009;

(c) the accompanying statement of changes in equity for the period ended 30 June, 2009 is drawn up so as to give a true and fair view of the movement in shareholder’s funds; and

(d) the accompanying cash flow statement is drawn up so as to give a true and fair view of the cash flows of the company for the period ended 30 June, 2009.

For and on behalf of the Board of Directors by authority of a resolution of the Directors.

NOTES TO AND FORMING PART OF THE
FINANCIAL STATEMENTS
TONGA POWER LIMITED
PERIOD ENDED 30 JUNE 2009

1 GENERAL INFORMATION

The company deals in the Tongan Pa’anga.

The company is a limited liability company incorporated and domiciled in Tonga. The company’s registered office is at the corner of Taufa’ahau Road and Matealona Road, Kolofo’ou, Nuku’alofa, Tonga.

This is the first set of accounts of the new company which was incorporated on 29 August 2007 and commenced operation on 25 July 2008. Consequently there are no comparative figures.

These financial statements were authorised for issue by the board of directors on 6 October 2009.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below.

(a) Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Public Enterprises Act 2002 and Companies Act, 1995.

These financial statements have been prepared under the historical cost convention, except for the revaluation of certain non current assets and financial instruments. All property, plant and equipment have been valued using the depreciated historical costs except for the distribution network assets which were valued using depreciated replacement costs, and the land and building were valued using market valuation.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates and management’s judgement in the process of applying the entity’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

(i) Application of IFRS 1 First-time Adoption of International Financial Reporting Standards

These are the first financial statements of the company to be prepared in accordance with IFRS. IFRS 1 first-time Adoption of International Financial Reporting Standards has been applied in preparing these financial statements.

On the adoption of IFRS, no transition adjustments are required in this period's financial statements.

(ii) Standards effective in 2008:

- IFRIC 14, ‘IAS 19 – The limit on a defined benefit asset, minimum funding requirements and their interaction’, provides guidance on assessing the limit in IAS 19 on the amount of the surplus that can be recognised as an asset. It also explains how the pension asset or liability may be affected by a statutory or contractual minimum funding requirement. This interpretation does not have any impact on the company’s financial statements.
- IFRIC 11, ‘IFRS 2 – Group and treasury share transactions’, provides guidance on whether share-based transactions involving treasury shares or involving group entities (for example, options over a parent’s shares) should be accounted for as equity-settled or cash-settled share-based payment transactions in the stand-alone accounts of the parent and group companies. This interpretation does not have an impact on the company’s financial statements.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

(iii) Standards and amendments early adopted by the company

IFRS 8, ‘Operating segments’, was early adopted during this financial period. IFRS 8 replaces IAS 14, ‘Segment reporting’. The new standard becomes mandatory for financial periods beginning on or after 1 January 2009. IFRS 8 requires a ‘management approach’, under which segment information is presented on the same basis as that used for internal reporting purposes. This has resulted in the segments being reported in a manner that is more consistent with the internal reporting provided to the ‘key decision maker’; the Executive Committee.

(iv) Interpretations effective prior to 2008 but not relevant to the company’s operations

The following interpretation to published standards is mandatory for accounting periods beginning on or after 1 January 2008 but is not relevant to the company’s operations:
- IFRIC 12; Service concession arrangements
- IFRIC 13; Customer loyalty programmes

(v) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the company

- IAS 1 (Revised), ‘Presentation of financial statements’ (effective from 1 January 2009). The revised standard will prohibit the presentation of items of income and expenses (that is, ‘non-owner changes in equity’) in the statement of changes in equity, requiring ‘non-owner changes in equity’ to be presented separately from owner changes in equity. All non-owner changes in equity will be required to be shown in a performance statement, but entities can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the income statement and statement of comprehensive income). Where entities restate or reclassify comparative information, they will be required to present a restated balance sheet as at the beginning comparative period in addition to the current requirement to present balance sheets at the end of the current period and comparative period. The company will apply IAS 1 (Revised) from 1 January 2009. It is likely that both the income statement and statement of comprehensive income will be presented as performance statements.
- IFRS 1 (Amendment) ‘First time adoption of IFRS’, and IAS 27 ‘Consolidated and separate financial statements’ (effective from 1 January 2009). The amended standard allows first-time adopters to use a deemed cost of either fair value or the carrying amount under previous accounting practice to measure the initial cost of investments in subsidiaries, jointly controlled entities and associates in the separate financial statements. The amendment also removes the definition of the cost method from IAS 27 and replaces it with a requirement to present dividends as income in the separate financial statements of the investor. The amendment will not have any impact on the company’s financial statements.
- IAS 1 (Amendment), ‘Presentation of financial statements’ (effective from 1 January 2009). The amendment clarifies that some, rather than all financial assets and liabilities classified as held for trading in accordance with IAS 39, ‘Financial instruments: Recognition and measurement’ are examples of current assets and liabilities respectively. The amendment is not expected to have an impact on the company’s financial statements.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

(a) Basis of preparation - continued

(v) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the company - continued

- IAS 16 (Amendment), ‘Property, plant and equipment’ (and consequential amendment to IAS 7, ‘Statement of cash flows’) (effective from 1 January 2009). Entities whose ordinary activities comprise renting and subsequently selling assets present proceeds from the sale of those assets as revenue and should transfer the carrying amount of the asset to inventories when the asset becomes held for sale. A consequential amendment to IAS 7 states that cash flows arising from purchase, rental and sale of those assets are classified as cash flows from operating activities. The amendment will not have an impact on the company’s operations because company’s ordinary activities does not comprise renting and subsequently selling of assets.

(b) Consolidation

The financial statements incorporate the assets and liabilities of the company as at 30 June 2009.

(c) Segment information

A business segment is a company of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that is subject to risks and returns that are different from those of segments operating in other economic environments.

The geographical segments identified in the primary reporting disclosures for the company are four. There is no secondary reporting as the company operates predominantly in the supply, distribution and supply of electricity to customers.

(d) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates (‘the functional currency’). The financial statements are presented in Tongan Pa‘anga and denoted “$”, which is the company’s functional and presentation currency.

(ii) Transaction and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of financial performance.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

(e) Property, plant and equipment

In accordance with IAS 16, the company records all plant and equipment at depreciated historical costs except for distribution network equipment which are measured using the depreciated replacement cost method. Land and buildings are valued at market costs less subsequent depreciation. Cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably.

All other repairs and maintenance expenditures are charged to the statement of financial performance during the financial period in which they are incurred.

Gains or losses on the disposal of property plant and equipment are recognised in the income statement.

Depreciation and amortisation are calculated on a straight line basis so as to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives.

The principal annual rates in use are:

<table>
<thead>
<tr>
<th>Class</th>

</tr>
<tr>
<td>Other Auxiliary Equipment</td>
<td>10%</td>
</tr>
<tr>
<td>Land &amp; Building</td>
<td>3.33%</td>
</tr>
</tbody>
</table>

(f) Leases

Lease in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

(g) Financial assets

The company classifies its financial assets in the following categories: at fair value through profit or loss, available-for-sale, held-to-maturity and loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.
2  SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

(g) Financial assets - continued

(i)  **Financial assets at fair value through profit or loss**

Financial assets at fair value through profit and loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term.

Currently there are no assets held by the company in this category.

(ii)  **Available-for-sale financial assets**

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Currently there are no assets held by the company in this category.

(iii)  **Held-to-maturity financial assets**

Held to maturity investments are non-derivative financial assets with fixed and determinable payments and maturities for which the company has the intention and ability to hold to maturity.

(iv)  **Loans and Receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. The company’s loans and receivables comprise ‘trade and other receivables’ and ‘cash and cash equivalents’ in the balance sheet.

The company does not engage in regular purchase and sale of financial assets.

Financial assets are derecognised when the rights to receive cash flows have expired have been transferred and the company has transferred substantially all risks and rewards of ownership or when it becomes apparent that a significant impairment exists.

The fair value of financial assets traded in active markets is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the company is the current bid price. The fair value of financial assets that are not traded in active markets is determined using valuation techniques.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

(h) Trade and other receivables

All trade and other receivables are recognised at the amounts expected to be received on settlement.

Collectability is reviewed on an ongoing basis and balances which are known to be uncollectible are written off. A provision is raised when doubt as to collection of a particular balance or classes of balances exists.

(i) Inventories

Inventories on hand and work in progress are stated at the lower of cost and net realisable value. Costs are assigned to individual items of stock on the basis of the landed direct cost, insurance, freight and an allocation of overhead expenditure, the latter being allocated on the basis of labour incurred. Adequate provision is made for slow moving and obsolete inventories.

(j) Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at cost. For the purposes of the cash flow statement, cash and cash equivalent assets comprise, cash on hand and at bank, deposits at call which are readily convertible to cash and net off bank overdrafts.

(k) Share capital

Ordinary shares are classified as equity and carried in the company’s financial statements at par value.

(l) Trade and other creditors

These amounts represent liabilities for goods and services provided to the company prior to the end of financial period which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

(m) Borrowings

Borrowings are recognised initially at cost and associated transaction costs and establishment are recognised in profit and loss when incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the statement of financial position date. The company held borrowings in line with its capital risk management policy, refer note 3(e).
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

(n) Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the statement of financial position date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

(o) Employee emoluments and benefits

(i) Wages, salaries and annual leave
Liabilities for wages and salaries, including annual leave expected to be settled within 12 months of the reporting date are recognised in other payables in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Long service leave
The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service.

During the period, the company did not have a long service leave scheme in place.

(p) Provisions

Provisions are recognised when there is a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

(q) Dividends

Provision is made for any dividend declared, determined or recommended by the directors on or before the end of the financial period but not distributed at period end.
(r) Revenue recognition

Revenue comprises the fair value of the sale of goods and services. The company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of company’s activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved.

(i) Electricity Income
Revenue from the supply of electricity is recognised based on meter readings. At the end of the financial period, revenue on unread meters is accrued based on average consumption throughout the period.

(ii) Provision of services
Revenue is generally recognised when services are rendered.

(iii) Interest income
Revenue is recognised when interest accrues to the net carrying amount of the financial assets held.

(iv) Rental income
Rental income is recorded on an accrual basis.
NOTES TO AND FORMING PART OF THE
FINANCIAL STATEMENTS
PERIOD ENDED 30 JUNE 2009

TONGA POWER LIMITED

3 FINANCIAL RISK MANAGEMENT

The entity's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk. The entity's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on financial performance.

Risk management is carried out by finance executives and management of controlled entities of the company. Management and finance executives identify, and evaluate financial risks in close co-operation with the company's operating units. The Board provides direction for overall risk management covering specific areas, such as mitigating foreign exchange, interest rate risk and credit risks, and investment of excess liquidity.

(a) Market risk

(i) Foreign exchange

Foreign exchange risk arises from recognised assets and liabilities that are denominated in a currency that is not the entity's functional currency (refer note 2 (d)). The company's loan is denominated in American dollars. As a measure, prompt settlement of liabilities (and assets if necessary) is exercised by management to minimise the exposure to foreign exchange losses. As an additional measure, the company negotiates competitive rates with its bankers to minimise losses and maximise gains when receipts and payments become due.

(ii) Political climate

The company operates in Tonga and changes to governments and the policies they implement affect the economic situation and ultimately the revenues of the company. To address this, the company reviews its pricing and service ranges regularly and responds appropriately.

(b) Credit risk

The entity has no significant concentrations of credit risk. The entity has policies in place to ensure that sales electricity and services are made to customers with an appropriate credit history. But with the absent of credit agency, the entity has policies that limit the amount of credit exposure to any one customer or company of customers.

Credit limits were exceeded during the reporting period from existing customers for whom a number do not have sufficient customer bonds in place. The company has revised its collection strategy and this has resulted in the significant improvement of the accounts receivable position at the end of the financial period. All new customers are now required to pay customer bonds.
3 FINANCIAL RISK MANAGEMENT - continued

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash, marketable securities, and the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business of the company, management aims at maintaining flexibility in funding by keeping committed credit lines available.

Management monitors monthly forecasts of the company’s liquidity reserve comprising of its undrawn overdraft facility and cash and cash equivalents (note 12). The forecasted liquidity reserve beginning 1 July 2009 and a subsequently in the 4 year period beginning 2010 to 2013 is as follows:

3 FINANCIAL RISK MANAGEMENT - continued

(d) Cash flow and fair value interest rate risk

As the company has no significant interest-bearing assets and borrowings, its income and operating cash flows are substantially independent of changes in market interest rates.

(e) Capital risk management

The company’s objectives when obtaining and managing capital are to safeguard the company’s ability to continue as a going concern and provide shareholders with a consistent level of returns.

The company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including ‘current and non-current borrowings’ as shown in the statement of financial position) less cash and cash equivalents. Total capital is calculated as ‘equity’ as shown in the statement of financial position plus net debt.

The gearing ratio of the company as at 30 June 2009 is as follows:

\[
\begin{align*}
\text{Total borrowings (note 18)} & = 16,110,885 \\
\text{Less: cash and cash equivalents (note 12)} & = (1,742,804) \\
\text{Net debt} & = 14,368,081 \\
\text{Total equity} & = 36,682,939 \\
\text{Total capital} & = 57,634,534 \\
\text{Gearing Ratio} & = 24.93\% \\
\end{align*}
\]
4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events believed to be reasonable under the circumstances.

(a) Critical accounting estimates and assumptions

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Income taxes
The company is subjected to income taxes in one jurisdiction. Since judgement is required based on the information available at balance date, differences are expected to arise when the applicable tax authorities issue their assessment of the company’s tax affairs. Such differences will impact the income tax expense and deferred tax provisions in the period in which they were made.

Appropriate alignment will be taken up subsequently.

(ii) Provisions - legal, doubtful debts, obsolescence and employee benefits
Provisions are measured at the value management best estimates an expenditure to be incurred at, to settle a present obligation at balance date. Market situations are often used to estimate provisions. Changes in market situations will create a difference between provisions with the recorded figures. Whilst the fact remains that uncertain issues such as legal, warranty and bad debts exist, management as a benchmark makes adequate provisions based on past record and the foreseeable future.

The provisions are aligned once the final outcome is known at balance date.

(iii) Depreciation
On acquiring an asset, management determines the most reasonable length of time it expects the company to maintain that asset with reference to characteristics of similar assets or classes of assets held by the company presently or in the past. This has been confirmed by Sinclair Knight Merz Limited Consultant, a company out of New Zealand. In the absence of local industry, benchmarking is done by comparing age of the assets to standard life of similar assets in New Zealand taking into account local climatic and environmental conditions.

At the end of the financial period, management assesses the carrying value of assets to determine whether they are impaired. Appropriate revisions to the policies are made, if necessary, or any significant impairment losses are accounted for in the financial statements as a corrective measure. Appropriate disclosure would normally follow.

(b) Critical judgements in applying the entity’s accounting policy

In applying its accounting policies, the company is not aware of any significant risk of material adjustment to the carrying amount of assets and liabilities that may change within the next financial year.

= 16,110,885

Westpac Bank of Tonga Loan
The loan from Westpac Bank of Tonga of USD6,050,000 (TOP12,131,542) is secured over all assets and undertakings of the company including Vava'u, 'Eua, Ha'apai and the Popua Power Station in Tongatapu (security over the Popua Power Station ranks second behind the security held by Caterpillar Financial Services Corporation over the same assets). The debt (principal and interest) are guaranteed by the Government of Tonga. The loan requires interest only payments until August 2011 from when it will become repayable at quarterly instalments of USD378,125. The loan attracts interest at 5.10063% per annum determined by the LIBOR rate plus a liquidity premium (currently at 1% p.a.) and an additional margin of 3% per annum.

Caterpillar Financial Services Corporation
The loan from Caterpillar Financial Services Corporation is secured over the Popua Power Station. The loan is repayable at USD67,377 per month and attracts interest at the rate of 8.25% per annum.

All the company borrowings are denominated in US dollars.

The exposure of the company’s borrowings to interest rate changes and the contractual repricing dates at the statement of financial position dates are as follows;

$  
Less than 1 year 1,391,041

<td>-</td>
</tr>
<tr>
<td>Unrealised</td>
<td>$(1,539,196)</td>
</tr>
</tbody>
</table>

Net foreign exchange gain/(loss) $(1,528,083)

Unrealised losses or gain on foreign currency transactions result in accordance with the accounting policy outlined in note 2(d) (ii). The unrealised losses arise because of the difference between the exchange rate at balance date and the original drawdown rate on the date of acquisition of the loan.
21 CONTRIBUTED EQUITY

Issued and paid-up capital
Ordinary shares of 1,000 at $32,783.60 per share 32,783,595

The company’s capital (authorised and issued) compromises ordinary shares only.

22 DIVIDENDS PER SHARE

No interim dividend paid out during the financial period.

The dividends are accounted for in accordance with the policy note 2(q)

23 RESERVES AND RETAINED PROFITS

(a) Revaluation Surplus

$  
At 25 July 2008 -  
Revaluation of plant and equipment 4,626,328  
At 30 June 2009 $ 4,626,328  

On completion of the company’s GIS mapping of all its Tongatapu and Vava’u Distribution and Network assets in May/June 2009, the company instituted a valuation of the same as at 30 June 2009. At 30 June 2009, after independent reviews by Messrs Nichols Consulting, Sinclair Knight Merz and PricewaterhouseCoopers New Zealand of the revised listings, age, carrying values and valuation methodology used, the directors revalued the company’s Distribution and Network assets from $24,389,985 to $29,016,313, on the basis of depreciated replacement costs. This resulted in the creation of an asset revaluation reserve amounting to $4,626,328.

(b) Accumulated losses

$  
At 25 July 2008 -  
Loss for the period (726,984)  
Dividends paid -  
At 30 June 2009 ($726,984)

25 RELATED PARTIES

Transactions of directors and director related entities

Directors

Persons who were directors of the company at any time during the financial period were as follows:

Mr. David Wright
Hon. 'O. Afu'alо Matoto
Mr. Warren Moyes
Mr. S. Tsutomu Nakao II
Mrs. 'Alisi Nunia Taumoepeau
Mr. Richard Guttenbeil

During the financial period, directors were paid fees and emoluments amounting to $30,685. Local director fees were $24,548 and overseas director fees were 6,137 for the company.

(a) Sales of Electricity

All electricity sales to Government Ministries and State Owned Enterprises amounted to $5,887,081. These transactions were made on normal commercial terms and conditions no more favourable than those which would have been adopted if the dealing was made at arm's length with another party in the same circumstances.

(b) Purchases of goods and services

All goods and services provided by Government Ministries and State Owned Enterprises to the company during the financial period totalled $1,398,158.

These transactions were on normal commercial terms and conditions no more favourable than those which would have been adopted if the dealing was made at arm's length with another party under the same circumstances.

$

=----------
26 RELATED PARTIES - continued

(c) Key management compensation
    Emoluments $ 658,055

(d) Financial period-end balances arising from sale and purchases of goods and services

    $  
    Receivables from related parties
      - Government Ministries and State Owned Enterprises $ -
    Payables to related parties
      - Government Ministries and State Owned Enterprises 189

The receivables from related party arise from the supply of electricity and are due one month after date of Billing. The receivables are unsecured and bear no interest.

Payables to the related parties arise mainly from purchase transactions and are due one month after the date of purchase. The payables bear no interest.

27 CONTINGENT LIABILITIES

Details and estimates of maximum amounts of contingent liabilities are as follows:

    $  
    Customer Bonds $ 268,978

In the opinion of the directors, no losses are anticipated in respect of any legal or fiduciary agreement at 30 June 2009.

The company has no further contingent liabilities other than those disclosed above.

28 COMMITMENTS FOR EXPENDITURE

(a) Operating leases

The company has a number of operating lease agreements with varying terms and conditions. The future aggregated minimum lease payments under these leases are as follows:

    $  
    Payable not later than 1 year $ 82,247

(b) Capital commitments

There was no capital expenditure contracted for at the reporting date.
29 PRINCIPAL ACTIVITIES

The principal business activity of the company is to generate and supply electricity to the people of Tonga. The company also undertakes certain electrical contracting work particularly for private customer service lines. Its registered office is located at the corner of Taufa'ahau Road and Mate'alona Road, Nuku'alofa, Tonga.
